ВАРИАНТ 2

ЧАСТ 1 (Време за работа: 60 минути)

Write your answers **on the separate answer sheet.**

LISTENING COMPREHENSION

Task One

You will hear a text twice. Before you listen to it for the first time, you have 30 seconds to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 1 minute to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

1. **The disappearance of unique customs and traditions poses a threat to the cultural identity of communities.**

A) True B) False

2. **Greenland's Inuit drum dancing dates back to nearly five centuries ago.**

A) True B) False

3. **Greenland's Inuit drum dancing has been widely practised without interruption since its origin.**

A) True B) False

4. **There are ongoing efforts to incorporate Inuit drum dancing into Greenlandic schools.**

A) True B) False

5. **One way to preserve traditions is by making them more familiar to younger generations.**

A) True B) False

Task Two

You will hear a text twice. Before you listen to it for the first time, you have 30 seconds to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 1 minute to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

6. Ronald Edward Galella's first photos were of well-known actors in the spotlight.

A) True B) False

7. Galella directed his autobiographic documentary *Smash His Camera*.

A) True B) False

8. Marlon Brando punched Galella in the face for following him through Central Park.

A) True B) False

9. Although Galella sued Brando, getting financial compensation was of little interest to him.

A) True B) False

10. Although many galleries exhibit Galella's photos, experts reject their artistic value.

A) True B) False

Task Three

You will hear a text twice. Before you listen to it for the first time, you have 4 minutes to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 4 minutes to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

11. The show host of *Theatre Tales* claims that Shakespeare's play *Macbeth* is …

A) the most famous Scottish tragedy.
B) cursed by most theatre goers.
C) considered bad luck if mentioned inside a theatre.
D) more popular than Shakespeare himself.

12. According to one theory, the superstition surrounding the play is believed to have derived from …

A) the playwright's alleged use of real spells in writing the play.
B) the participation of real witches in performances on the Elizabethan stage.
C) the cultural beliefs surrounding witches at the time.
D) Shakespeare's masterful crafting of supernatural themes.

13. Saying the name of the play *Macbeth* inside a theatre was thought to bring about …

A) bad luck in the personal life of all actors.
B) the destruction of the theatre house.
C) the doom of the running performance.
D) the disgrace of the playwright.

14. From a historical perspective, once in England …

A) every theatre in the country had its own playwright.
B) no theatre wanted to put *Macbeth* on stage.
C) comedies were more popular than tragedies.
D) *Macbeth* enjoyed tremendous popularity.

15. Theatre companies used to make decisions about their repertoire based primarily on …

A) the income a performance brought.
B) the genre of the play performed.
C) the fame of the author of the play.
D) the common superstitions among the crowd.

Task Four

You will hear a text twice. Before you listen to it for the first time, you have 4 minutes to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 4 minutes to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

16. For the interviewer in the studio, the story of *Armageddon Time* felt personal because …

A) the film itself is quite unusual.
B) she had been personally involved in the film production.
C) she felt connected to moments portrayed in the film.
D) she has known James Gray for eighteen years.

17. According to James Gray, every parent should above all …

A) show their children deep affection.
B) have something delicious to put on the table.
C) be on the alert not to make mistakes.
D) make the best of any situation.

18. When James Gray was a child …

A) his parents were very well-off.
B) his father would abuse his mother.
C) his grandfather was the key figure to him.
D) his family lived in peace and harmony.

19. Jeremy Strong did a wonderful job in the role of James Gray's father mainly because …

A) James Gray introduced him to his grandfather, who shared his memories with him.

B) Jeremy Strong relied on his artistic intuition which proved really powerful.

C) James Gray showed the actor a lot of pictures made by his father.

D) Jeremy Strong studied exhaustively the family story of his character's prototype.

20. The Proust questionnaire is probably a set of …

A) very tricky IQ questions.

B) sensitive personal questions.

C) typical Depression-era questions.

D) simple yet insightful questions.

Task Five

You will hear a text twice. Before you listen to it for the first time, you have 4 minutes to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 4 minutes to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

21. As an artist, Françoise Gilot …

A) preferred to draw imaginary exotic landscapes.

B) believed that true art reflects the surrounding world.

C) thought art is an expression of the artist's innermost self.

D) used sketches to remember her impressions of a place.

22. After obtaining her BA degree at the Sorbonne, Gilot became ...

A) a philosophy student.

B) an art student.

C) a qualified lawyer.

D) a teacher of fine art.

23. According to critics and to Gilot herself, her art is greatly influenced by …

A) Picasso.

B) Henri Matisse.

C) Georges Braque.

D) no one.

24. Françoise Gilot's last book does NOT include …

A) watercolours.

B) oil paintings.

C) drawings.

D) text.

25. The sketches in Gilot's latest book are …

A) a wonderful sample of her traditional style.

B) exquisite to the very last detail.

C) all left unfinished on purpose.

D) a combination of visual and verbal art.

ВАРИАНТ 2

ЧАСТ 2 (Време за работа: 180 минути)

Write your answers ***on the separate answer sheet****.*

READING COMPREHENSION

Task One

Read the text below. Then read the questions that follow it and choose the best answer to each question, marking your answers on your answer sheet.

The word "scientist" was coined in 1834 by Cambridge University historian and philosopher William Whewell to describe someone who studies the structure and behaviour of the physical and natural world through observation and experiment. You could argue, then, that the first modern scientist was, say, Charles Darwin or Michael Faraday, two iconic figures who were Whewell's contemporaries. But even if the term didn't exist before the 1830s, there were people who embodied its principles.

To find the very first scientist, we must travel further back in time. For example, we could go back to the most ancient of the ancient Greeks, Thales of Miletus, who achieved much in both science and mathematics. However, Thales left no written record and may have been, like Homer, a celebrated figure who received credit for many great achievements but who may never have existed at all.

According to Brian Clegg, an award-winning British science writer, a modern scientist must recognise the importance of experiment, embrace mathematics as a fundamental tool, consider information without bias and understand the need to communicate. Many individuals in the 17th century, including Isaac Newton, satisfied most of these requirements. But to find the first scientist with these characteristics, you have to travel to the Renaissance and, of course, Galileo Galilei, who overturned Aristotle's ideas on motion and began to explain such complex concepts as force, inertia and acceleration. He built one of the first telescopes and used it to study the

cosmos. What he saw through the lenses of his device removed Earth from the centre of the universe and put it in its proper place. In all his work, Galileo stressed the need for observation and experimentation. And yet Galileo owes much to another figure born twenty years earlier.

His name was William Gilbert, a rather obscure figure in the history of science.

Gilbert graduated from Cambridge University, settled in London and embarked on a successful career as a physician, attending to Queen Elizabeth I. His investigations into the nature of magnetism culminated in the first significant book about physical science published in England, "*On the Magnet, Magnetic Bodies, and the Great Magnet of the Earth*". He was the first person to fully explain how a magnetic compass worked and to propose that the Earth was a magnetic planet.

William Gilbert greatly influenced Galileo. The famous Italian read Gilbert's work, repeated many of his experiments and proclaimed Gilbert the founder of the scientific method.

Many identify Francis Bacon as the father of the scientific method. Bacon certainly popularized the methods and techniques of scientific inquiry, but he was more of a philosopher than an experimenter. William Gilbert and Galileo, by contrast, were hands-on scientists. They designed experiments, carried them out and recorded their results with commitment, which is one of the hallmarks of modern science.

26. Ancient Greeks considered Thales of Miletus their first scientist because of the many scientific books he wrote.

A) True B) False

27. According to Brian Clegg, what lies at the core of modern science is experimentation.

A) True B) False

28. Galileo Galilei changed fundamentally man's perceptions of the nature of motion and the universe.

A) True B) False

29. William Gilbert was a very successful physicist at the court of Queen Elizabeth I.

A) True B) False

30. Francis Bacon was rather a scholar and a philosopher than a scientist.

A) True B) False

Task Two

Read the text below. Then read the questions that follow it and choose the best answer to each question, marking your answers on your answer sheet.

You'll be surprised to hear that there was a time when Bobbie was more remarkable for the weakness of his memory than anything else.

In the early days of our acquaintance, if I wanted to dine with Bobbie, I used to post him a letter at the beginning of the week, and then the day before send him a telegram and make a phone-call on the day itself. By doing this I generally managed to get him.

Bobbie wasn't a fool, though.

One day he fell in love and got married, as if it were the greatest fun in the world. She wasn't the sort of girl you would have expected Bobbie to be enthusiastic about. She worked for her living; and to a fellow who has never done a hand's turn in his life, there's undoubtedly a sort of fascination, a kind of romance, about a girl who works for her living.

Her name was Mary Anthony. She was about five feet six; she had a ton and a half of red-gold hair, grey eyes, and one of those determined chins. She was a hospital nurse.

Bobbie broke the news to me at the club one evening, and next day he introduced me to her. I admired her. Mary and I got along together splendidly. She seemed to think that Bobbie was the greatest thing on earth, judging by the way she looked at him when she thought I wasn't noticing. And Bobbie seemed to think the same about her. So I decided they had a good chance of being happy.

They took a flat and settled down. Everything seemed to be running along as smoothly as you could want. If this was marriage, I thought, I couldn't see why some fellows were so frightened of it.

But we now come to the incident of the quiet dinner and it's just here that love's young dream hits a snag and things begin to occur.

I happened come across Bobbie in Piccadilly and he asked me to dinner at their flat. When we got there, there was Mrs. Bobbie looking – well, I tell you, it staggered me. Her gold hair was all piled up in waves and crinkles, with a what-d'-you-call-it of diamonds in it. And she was wearing the most perfect dress.

"Here's old Reggie, dear," said Bobbie. "I've brought him to dinner … What?"

She stared at him as if she had never seen him before. Then she turned scarlet. Then she turned as white as a sheet. Then she gave a little laugh. It was most interesting to watch, but it made me wish I was miles away. Then she recovered herself.

"I am so glad you were able to come, Mr. Pepper," she said, smiling at me.

After that she was all right. She talked and played us ragtime on the piano, as if she hadn't a care in the world. However, I knew that she was working hard the whole time to keep herself in hand, and that she would have given everything she possessed to have one good scream, just one. I've sat through some pretty thick evenings in my time, but that one surpassed them all by a mile. At the very earliest moment I grabbed my hat and got away.

On the next day I met Bobbie at the club. He started straightway, obviously glad to have someone to talk to.

"Do you know how long I've been married?' he said.

I didn't exactly. "About a year, isn't it?"

"Not *about* a year," he said sadly. "*Exactly* a year – yesterday!"

"Yesterday was ...?"

"The anniversary to the wedding. I'd arranged to take Mary to the Savoy, and then on to Covent Garden. I had the ticket for the box in my pocket. Do you know, all through dinner I had a kind of vague idea that there was something I'd forgotten, but I couldn't think what?"

"Till your wife mentioned it?"

He nodded.

"Women are so easily offended," he said gloomily. "Reggie, she's gone! It's such a little thing to make a fuss about. And she knows that I just can't remember things. Never could."

31. Years ago, Bobbie was most known for his ...

A) remarkable intellect.
B) poor memory.
C) quick temper.
D) lack of common sense.

32. The narrator's attitude to marriage …

A) is really positive and encouraging.
B) is that it is a scaring experience.
C) is that it should be based on a romance.
D) is not very clear from the passage.

33. The narrator thought that Mary Anthony was …

A) too tall for Bobbie.
B) too ordinary for Bobbie.
C) a good match for Bobbie.
D) merely a gold digger.

34. The "quiet dinner" …

A) proved Mary an exquisite hostess.
B) made the narrator feel uncomfortable.
C) turned out to be an evening of much noise and screams.
D) was a totally enjoyable experience for all.

35. Mary was angry because she …

A) she had no proper dress for a night out.
B) she wanted just an ordinary quiet evening with Bobbie.
C) she would not set foot in either the Savoy or Covent Garden.
D) her husband had forgotten their wedding anniversary.

36. The tone of the story would best be described as …

A) tragic.
B) humorous.
C) cheerful.
D) melancholy.

Task Three

Read the text below. Then read the questions that follow it and answer each question with a sentence of your own. Write your answers on your answer sheet. Sentences copied word for word from the text will get 0 points.

The Mechanical Turk: An 18th-Century "AI" Sensation

In 1769, a Hungarian inventor named Wolfgang von Kempelen unveiled what seemed like a miracle of human ingenuity – a mechanical man, dressed in elegant Turkish robes, capable of playing chess against the greatest minds of Europe. The automaton, known as the Mechanical Turk, could move pieces with precision, anticipate its opponent's strategies, and even correct mistakes. It wasn't just a machine; it was a spectacle, a glimpse into a future where intelligence wasn't confined to flesh and blood but could exist within gears and cogs.

The Turk quickly became a sensation. It travelled across royal courts and grand salons, challenging the most brilliant players of the time. Even Napoleon Bonaparte himself couldn't resist testing his wits against it. The legend goes that during their match, Napoleon tried to trick the machine by making an illegal move. The Turk, unfazed, reached forward, swiped the offending piece off the board, and reset the game – a reaction so lifelike that the emperor burst into laughter. The world marvelled at the idea of a machine that could think, strategise, and even outsmart humans.

For nearly a century, the Mechanical Turk roamed the world, mesmerising crowds and humiliating overconfident challengers. But behind its impressive façade there was a secret that no one in the audience could have imagined. Beneath the wooden cabinet that supposedly housed the machine's gears and mechanisms, a human chess master sat hidden in the shadows, controlling every move. The brilliant automaton was nothing more than an elaborate illusion, a carefully orchestrated hoax that played into humanity's deepest desires – a belief that intelligence could be created, that machines could rival the human mind.

Despite being a deception, the Mechanical Turk ignited something powerful: a fascination with the idea of artificial intelligence long before the term even existed. It wasn't just a party trick; it was a promise of what the future could hold. More than 200 years later, the dream of a thinking machine is no longer an illusion. Today, AI-powered systems can outplay grandmasters, diagnose diseases, compose music, and hold conversations indistinguishable from those of a human. What once was a trick designed to entertain royalty has evolved into one of the greatest scientific revolutions in history.

The irony is that AI, in many ways, still carries traces of its old deception. Just as the Turk required a hidden human to function, much of modern artificial intelligence still relies on human intervention, data, and programming to appear truly intelligent. In fact, Amazon named its crowdsourcing AI platform "Mechanical Turk" as a sign of recognition of the 18th-century trickster, acknowledging that even today, some tasks that seem automated still require human involvement behind the scenes.

The Mechanical Turk may not have been real, but the dream it represented – the dream of artificial intelligence – was. And as machines continue to learn, evolve, and even surpass human intelligence in certain fields, we are finally living in the future that 18th-century audiences once only imagined. The illusion is no longer necessary because reality has caught up.

37. Who invented the Mechanical Turk and when did that happen?

38. Why did audiences believe the Mechanical Turk was capable of real intelligence?

39. What specific details about the Mechanical Turk's appearance and movements made people believe it was a real thinking machine?

40. How did Napoleon Bonaparte try to challenge the Mechanical Turk's intelligence during their match, and what was the machine's unexpected response?

41. How did the Mechanical Turk actually manage to defeat some of the best chess players of its time?

42. How did the Mechanical Turk influence public perception of machines and their potential intelligence?

43. Why did Amazon choose to name its crowdsourcing AI platform "Mechanical Turk"?

WRITING

You are required to do BOTH tasks.

Внимание: В случай на непристоен език, плагиатство или текст, идентичен с този на друг ученик, на съответния текст се присъждат 0 точки.

44. ***Read the task and write a formal letter (120 – 130 words), including the suggested prompts.***

You are a university student and have observed that the library's operating hours in your university are insufficient to meet the needs of students, especially during examination periods. Write a letter to the Head Librarian in which you:

- explain why the current library hours are inadequate;
- propose practical measures to address the issue;
- express willingness and ways to assist.

Sign your letter with **James Blake / Jane Blake.**

Писмен текст с обем под 65 думи или текст, изцяло несъответстващ на темата, се оценява с 0 (нула) точки.

45. ***Read the task and write an essay (200 – 220 words), expressing your opinion on the set topic.***

The Future of Work. How will workplaces change in the next decade? Consider the following:

- pros and cons of technological advancement;
- workplace dynamics, i.e. the way people interact when they work together;
- professional skills development.

Писмен текст с обем под 110 думи или текст, изцяло несъответстващ на темата, се оценява с 0 (нула) точки.

LISTENING COMPREHENSION

Task One

You will hear a text twice. Before you listen to it for the first time, you have 30 seconds to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 1 minute to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

Preserving endangered cultural practices is essential for maintaining the unique identities and histories of communities worldwide. Many traditions, like Greenland's Inuit drum dancing, face extinction due to globalization and past colonial suppression. Drum dancing, a 4,500-year-old ceremonial practice, was once integral to Inuit culture but was nearly lost after Danish colonizers banned it in the 18th century. Now, cultural advocates like singer Varna Marianne Nielsen work to revive it by introducing it into school curricula, fostering cultural pride and continuity among young Greenlanders. Organisations such as UNESCO support these efforts by funding and promoting practices that are vital to cultural identity. Preservation often involves adapting traditions for modern settings, such as integrating them into educational programs or community festivals, bridging generations and allowing cultural evolution.

Task Two

You will hear a text twice. Before you listen to it for the first time, you have 30 seconds to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 1 minute to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

Ronald Edward Galella is an American photographer. Time magazine defined him as "the Godfather of the U.S. paparazzi culture". Galella served as a photographer during the Korean War and later graduated with a degree in photo-journalism. In his free time Galella took pictures of film stars and other celebrities and soon became known for portraying famous people out of the spotlight.

Galella's photographs can be seen in hundreds of publications. They have also been exhibited at museums and galleries throughout the world.

Galella is the subject of a 2010 documentary film entitled *Smash His Camera* directed by Leon Gast. The film's title is a quote from Jacqueline Kennedy Onassis to her security agent after Galella pursued her and her children through Central Park. The documentary premiered at the 2010 Sundance Film Festival, where it received the Grand Jury Award for Directing in the U.S. Documentary category.

On June 12, 1973, actor Marlon Brando punched Galella in the face outside a restaurant in China Town in New York City, breaking the photographer's jaw and knocking out five of his teeth. Galella had been following Brando earlier that day. Galella hired a lawyer to sue Marlon Brando and finally received over $25,000 but actually cared only about getting out a message, which was: "I don't want anyone to think they can go around punching me if I am taking their picture." The next time Galella chased Brando, he wore a football helmet.

In spite of these controversies, art galleries across the world have acclaimed Galella's work for its artistic and socio-historical value.

Task Three

You will hear a text twice. Before you listen to it for the first time, you have 4 minutes to read the tasks to the text. While listening for the first time <u>you are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 4 minutes to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark

your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

Welcome to *Theatre Tales,* the show where drama extends beyond the stage! Today, we're diving into the mystique and superstition of one of Shakespeare's most popular tragedies *Macbeth*. More famous than the play itself, perhaps, is the fabled curse surrounding it. It's a common superstition among actors that it's bad luck to say the word 'Macbeth' inside a theatre unless the play itself is being performed or rehearsed. Instead, actors often refer to it as "The Scottish Play" or "MacBee".

The most common theory about the origin of this superstition is that Shakespeare interwove real spells and incantations used by witches into the play. So, saying the name of the play inside a theatre will cause doom and destruction on the current theatrical production. Another hypothesis for the origin of this superstition has to do with the financial situation of theatre houses. If a play wasn't drawing in enough money for the theatre, it would be replaced with a crowd favourite. And *Macbeth* was an extremely popular play in those days. It was a box-office hit and guaranteed a full house. So if you heard people in the cast and crew murmuring 'Macbeth', that could be a sign that the current production wasn't going well and the theatre was considering scrapping it and replacing it with a money-making classic. So eventually, the fear of failure turned into a superstition that even mentioning the word 'Macbeth' inside a theatre would cause the current production to fall apart and be replaced with another play.

Does the "curse of Macbeth" truly exist? I'd say it all depends on how much power you give it in your mind. The human subconscious is a powerful thing. For some, the "curse of Macbeth" is just a fun theatre tradition. For others, it's very real.

Task Four

You will hear a text twice. Before you listen to it for the first time, you have 4 minutes to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 4 minutes to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

Journalist - female
James Gray

Journalist: Today, we're thrilled to have in the studio with us James Gray - an American film director and screenwriter. Hi, James. How are you today?

J.G.: I'm doing alright. I hear we're diving into filmmaking today.

Journalist: Absolutely. We'll talk about your latest film, *Armageddon Time*. It's a personal story for you, but strangely, it felt personal for me too. Not because I had anything to do with it, but because I've known you since you were 18. Watching the movie, especially the Passover dinner scene, I had this surreal feeling, like, "I've been there."

J. G.: Oh, the patience you had! And what admirable willingness to suffer! If you'd come to one of those dinners when I was 12, you might have found it more entertaining. Once my mother passed away and my father remarried, the whole family dynamic shifted. The atmosphere became … heavier, I guess.

Journalist: Your grandfather was a constant presence in your home, wasn't he?

J. G.: Yes. Being a parent is hard - you try your best, but you inevitably make mistakes. What matters most is making your kids feel wanted and loved. My parents, though, didn't really do that. They were overwhelmed with survival - just trying to make ends meet in the late '70s was a constant struggle. My father, in particular, often took out his frustrations on us, especially me. But my grandfather was different. He took the time to make us feel valued. He always made it clear that we mattered. He encouraged us to follow our dreams and loved us unconditionally, without judgment.

Journalist: Knowing your dad and seeing Jeremy Strong in the role, it struck me, because he's very much your dad …?

J. G.: Oh, he definitely is.

Journalist: He really has captured something so vivid about him. How did you introduce Jeremy to who your father was and how did you guys work on that performance?

J. G.: I tried to put as much detail into the script as I could, but I didn't want him to do an imitation of my dad. I was very resistant to that. I showed him some pictures, but I said, "I want you to do your own thing. What you need to know about my father is in the screenplay." At Jeremy's request, I did the Proust questionnaire and I answered, with my dad's voice, as I thought my father would, some simple questions like "What did he eat?", "What did he wear?" or "What was his greatest fear?". I remember when Jeremy showed up on set trotting clumsily with a bow-legged walk, I said, "How did you know that?" My father

had rickets when he was very young, he was a Depression-era kid. He said, “I don’t know. I just felt it.”

Task Five

You will hear a text twice. Before you listen to it for the first time, you have 4 minutes to read the tasks to the text. While listening for the first time you <u>are not allowed to mark</u> your chosen answers. After you listen to it for the first time, you have 4 minutes to mark your chosen answers on your answer sheet. While listening to the text for a second time, you can mark your chosen answers. After you listen to the text for the second time, you have 1 more minute to check or correct your answers.

The esteemed French painter and author Francoise Gilot, famously known as the former lover and muse to Pablo Picasso, passed away at the age of 101. In 2018, at 96, she published a book of sketches from her travels to India, Senegal and Venice. While most artists use sketchbooks to turn their impressions into material for their work – to help them remember, – Gilot used hers to forget. “Things I have seen, I want to take them out of my mind,” she says. “Art doesn’t come from what is around you, but from what is inside of you,” she writes in her last book, which includes drawings and watercolours that offer an intimate glimpse into Gilot’s inner life and bear little stylistic resemblance to her public work.

Gilot was born in a suburb of Paris in 1921. Her parents insisted that their daughter should pursue a law degree after she graduated from the Sorbonne in 1938 with a bachelor’s degree in philosophy. But while at law school, in her free time Gilot studied art at the studio of Hungarian painter Endre Rozsda and eventually abandoned her legal education. She met Picasso at a restaurant in Paris, in 1943. She was 21; he was 61. During their roughly 10 years together, Gilot met Henri Matisse and Georges Braque, though she claims her art is not influenced by anyone. “I don’t believe in influences,” she says. Picasso’s biographer John Richardson agreed: “Picasso took from her rather more than she took from him.”

The sketches in Gilot’s last book are a stylistic departure from her body of work, and she considers them deliberately unfinished, as they were in the notebooks she kept while travelling, except for the sketches from Venice, a city that has captivated her since childhood. They contain watercolour drawings but also words, written in careful, beautiful script. For Gilot, colours, text and shapes are used synesthetically, involving more than one sense.“If you can think of something in words, then you can see it in images too,” she believed.

Въпросите от **№ 37 до № 43** са отворени. Задачите с кратък свободен отговор се оценяват с **0 точки, 1 точка** или **2 точки** в зависимост от верността и пълнотата на отговора. При проверка на задачите с кратък свободен отговор не се вземат предвид правописни и граматически грешки. В отговора се оценява съответствието между информацията в него с тази в текста.

Отговорите на отворените въпроси са примерни. Приема се за верен всеки отговор, формулиран по различен начин, но съответстващ на въпроса и на информацията.

37. Who invented the Mechanical Turk and when did that happen?
The Mechanical Turk was invented in 1769 **(1 p.)** by Wolfgang von Kempelen, a Hungarian inventor. **(1 p.)**

38. Why did audiences believe the Mechanical Turk was capable of real intelligence?
Because of its ability to play chess like a human **(1 p.)**, making strategic decisions, correcting mistakes, and even anticipating its opponent's moves. **(1 p.)**

39. What specific details about the Mechanical Turk's appearance and movements made people believe it was a real thinking machine?
Its impressive façade / it looked like a real man dressed in elegant Turkish clothes. **(1 p.)**
The automaton's lifelike arm movements, and its ability to pick up chess pieces smoothly and move them with precision **(1 p.)**

40. How did Napoleon Bonaparte try to challenge the Mechanical Turk's intelligence during their match, and what was the machine's unexpected response?
Napoleon attempted to outsmart the Mechanical Turk by deliberately making an illegal move **(1 p.)**, but the machine swiftly removed the incorrect piece off the board and reset the game. **(1 p.)**

41. How did the Mechanical Turk actually manage to defeat some of the best chess players of its time?
A human chess master sat hidden beneath its wooden cabinet **(1 p.)** and secretly controlled its moves, (ensuring that it always played with skill and precision). **(1 p.)**

42. How did the Mechanical Turk influence public perception of machines and their potential intelligence?
People were fascinated by the idea that machines could think like humans. **(2 p.)**

43. Why did Amazon choose to name its crowdsourcing AI platform "Mechanical Turk"?
Amazon named its platform "Mechanical Turk" as a sign of acknowledgement of the 18th-century chess-playing automaton, **(1 p.)** and also to highlight that (like the original hoax) tasks that seem automated (performed by AI) are actually performed by human workers (who develop the AI). **(1 p.)**

Критерии за оценяване на текст:

44. <u>Първа задача - официално писмо</u>
0-5 точки: Съдържателно съответствие с темата, смислова свързаност и логическа последователност (вкл. и спазване на регистъра);
0-3 точки: Структура на текста (вкл. и спазване на зададения обем и формат);
0-5 точки: Правилна и адекватна употреба на лексиката, лексикално богатство;
0-5 точки: Граматическа правилност (морфологична и синтактична правилност);
0-2 точки: Правопис.

45. <u>Втора задача – аргументативно есе за изразяване на мнение по даден въпрос</u>

0-8 точки: Съдържателно съответствие с темата, смислова свързаност и логическа последователност (умение за представяне на факти, за формулиране на позиция);
0-2 точки: Структура на текста (вкл. и спазване на зададения обем и формат);
0-9 точки: Правилна и адекватна употреба на лексиката, лексикално богатство;
0-9 точки: Граматическа правилност (морфологична и синтактична правилност);
0-2 точки: Правопис.
